invasive and non-invasive studies of the human autonomic nervous system

A Satellite Meeting of ISAN2009
September 5-6, 2009
School of Medicine
University of Western Sydney

microneurography
noradrenaline release
neurochemistry
pharmacology
functional MRI
tissue imaging
blood flow
blood pressure

This official ISAN Satellite will bring together experts in the assessment of human autonomic function through invasive and non-invasive approaches. Symposia will include imaging, neurochemistry, pharmacology and microneurography, with the aim to develop ways of optimizing human autonomic research. Invited participants include:

Italo Biaggioni USA

Pietro Cortelli ITALY

Hugo Critchley UK

Andre Deitrich USA

Mikael Elam SWEDEN

Murray Esler AUSTRALIA

John Floras CANADA

Roy Freeman USA

Qi Fu USA

Christopher Gibbons USA

David Goldstein USA

Ron Harper USA

Karsten Hausser GERMANY

Max Hiltz GERMANY

Luke Henderson AUSTRALIA

Satoshi Iwase JAPAN

Jens Jordan GERMANY

Michael Joyner USA

Horacio Kaufman USA

Gavin Lambert AUSTRALIA

Phillip Low USA

Vaughan Macefield AUSTRALIA

Tadaaki Mano JAPAN

Mikael Sander DENMARK

Henrique Sequeiro FRANCE

Kevin Shoemaker USA

Jens Tank GERMANY

Gunnar Wallin SWEDEN
